Notes on the University Entry Survey

The Education Documentation Act (Bildungsdokumentationsgesetz) promulgated in the Federal Law Gazette I Nr. 12 of January 8th 2002 regulates the usage of pupils' and students' data for administrative and statistical purposes. Statistik Austria is commissioned to prepare the yearly education statistics. § 9 par. 6 allows for the surveying of first-year students on their social and familial situation.

The Ustat 1 questionnaire serves to collect statistical information on education-related and socio-economic characteristics of persons studying at Austrian universities or enrolled in Specialized College education courses (*Fachhochschul-Studiengänge*). Surveys on the social background of first-year students provide important indicators of a country's higher education system and form an essential basis for the planning of regional, national as well as international education and training policies.

The Ustat 1 questionnaire applies to the area of universities as well as to Specialized College education courses (*Fachhochschul-Studiengänge*).

12. In the window „Data entered“, check all your data. If they are correct, click on „Continue“.
